### The harmony of air and earth

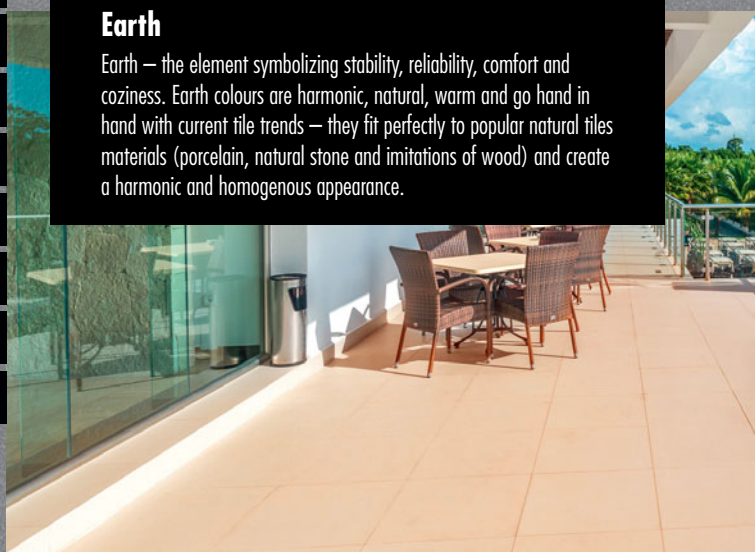

#### Air

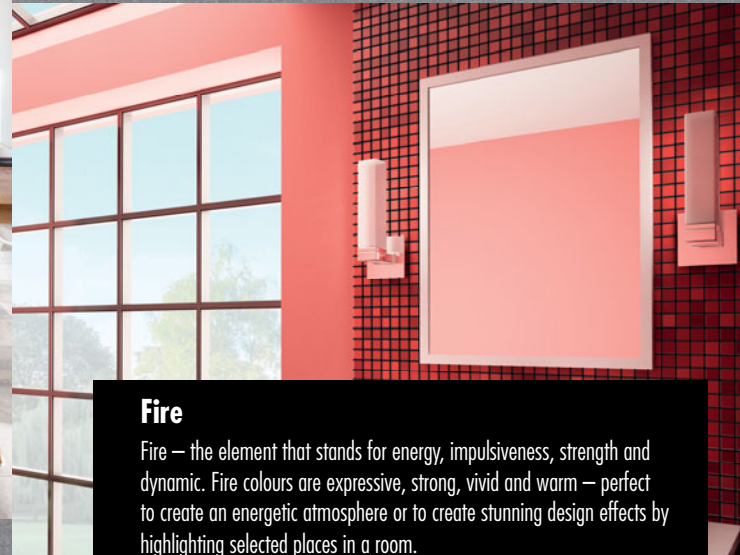

Air – the element of the mind and soul, clarity and balance. Air colours are light, clean, delicate and unpretentious – they match the trend for simplicity in tiles and create an almost uniform and seamless wall or floor.

#### Earth

Earth – the element symbolizing stability, reliability, comfort and coziness. Earth colours are harmonic, natural, warm and go hand in hand with current tile trends – they fit perfectly to popular natural tiles materials (porcelain, natural stone and imitations of wood) and create a harmonic and homogenous appearance.

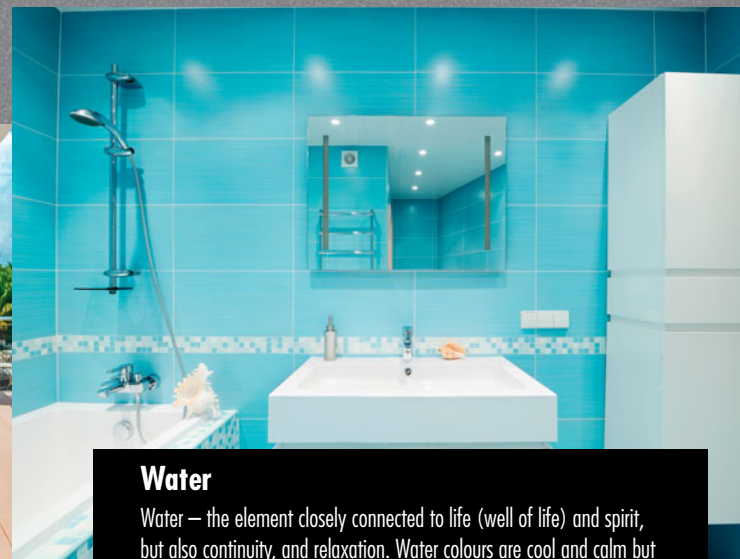

### The contrast of fire and water

#### Fire

Fire – the element that stands for energy, impulsiveness, strength and dynamic. Fire colours are expressive, strong, vivid and warm – perfect to create an energetic atmosphere or to create stunning design effects by highlighting selected places in a room.

#### Water

Water – the element closely connected to life (well of life) and spirit, but also continuity, and relaxation. Water colours are cool and calm but also refreshing – they can bring a soothing spa effect into your room or can create fresh accents.
